Workplace Experience

Your people are your greatest asset—optimize their workplace experience with Density’s anonymous people-counting technology.
Program, design and deliver the ideal workplace experience with Density’s real-time data insights.

Avoid Service Shortfalls
Adjust your workplace amenities to actual usage, and improve services from catering to cleaning.

Increase Productivity
Gain a central, intuitive UI to manage your portfolio and maximize for utilization.

Validate Design
Test space designs to match the workplace experience to employee needs.
Make Workplace Experience A Competitive Advantage

Attract
65% of US workers believe that workplace design is equally or more important than location when considering a new job.¹

Retain
67% of UK workers attributed the reason for leaving their last role to a workplace not optimized for their needs.²

Save Time
The average employee spends a staggering 27 hours each year looking for the best space to work over the course of the day — costing the average company $31 million in productivity annually.³

Meet Needs
70% of highly satisfied workers are able to choose a variety of spaces.⁴ Only 55% employees report having the right space available when they need it.⁵

⁵ Gartner: “Employees hunt for a spot to work costs $31 Million a year. https://www.cebglobal.com/blogs/real-estate-employees-hunt-for-a-spot-to-work-costs-31-million-a-year
Use Density’s data insights to optimize the workplace experience and boost employee productivity.

Density helps enterprises maximize workplace performance for their people and the space they use. Use Density’s analytics to collect comprehensive utilization data and understand how employees interact with the work environment. Reduce operating expenses by ensuring that janitorial, culinary, workplace, and facility teams optimize amenities and services based on actual usage. And view utilization data in Density’s central dashboard, or integrate with workplace applications.

Knoll

“Our clients often struggle with how to make the best decisions and Density now helps provide clarity and transparency.”

Kylie Roth, Senior Director, Workplace Research at Knoll

How it Works

**Easy Install**
Install Density Depth Processing Unit (DPU) over an entryway. PoE+ or WiFi and a standard outlet.

**Real-Time Monitoring**
Once installed, DPU uses Class 1 infrared lasers and computer vision to monitor entrance and exit events in real time.

**Count Every Person**
Density instantly and accurately identifies human entrances and exits without ever collecting personally identifiable information (PII).

**Portfolio-wide Visibility**
Use data on attendance, predictive insights and utilization to improve workplace experience.
A publicly-traded design firm for workplace furniture worked with Density to measure how their spaces, and their client’s spaces, are used.

Density’s solution included:

• Real-time anonymous people-counting of Knoll Showroom
• Adjusting conference room strategy to feature more interactive AV equipment.
• Understand why employees preferred one space over another
• Rationalize allocation of conference rooms

“There is a constant iteration where it’s way beyond ‘one-size-fits-all.’ There’s data that’s driving it ... making the space a little bit more tuned-in to what the users are trying to do [in the workplace].”

Tracy Wymer, Vice President of Workplace, Knoll
About Tangible

For the past 12 years, we have been designing experiences for a variety of clients, ranging from events and public spaces to retail stores and corporate offices. No matter the setting, our goal is to create a memorable and inspiring experience. With Covid-19 disrupting the way we do things on an everyday basis, we are focusing our energy into the small things that can make us feel safe as we return to venues, stores and offices.

We’ve worked globally with brands such as Adidas, Nike, Google, Facebook, Ralph Lauren, Chanel, and Samsung. Our recent partnership with Density has allowed us to continue to design with a people first mentality.

About Density

Density is the new occupancy analytics platform. Using proprietary sensors and software, the platform accurately measures foot traffic throughout buildings. Clients use Density to reassure occupants of their safety, their experiences, and evaluate policy effectiveness and planning. Unlike alternatives—which are either invasive or imprecise—Density is both anonymous by design and the industry’s most accurate system. Together, Density’s customers manage over 100 million square feet of occupancy areas. Density was founded in 2014, with offices in San Francisco, New York City, and Syracuse, New York.
